

TOKYO ELECTRON EUROPE LIMITED

Field Service & Start Up Engineers

Closing date: 31st of March

Region: Italy

The ROLE in summary

Tokyo Electron is a leading global manufacturer of innovative production systems for the semiconductor industry. With a team of more than 12,700 employees in 18 different countries, we are continuously working on developing high-quality, technologically qualitative products.

As a Field Service Engineer or Start up Engineer, you will support our customers in Italy and based on business needs, across Europe. The Start Up Engineer role usually involves extensive travel on an international basis to our European customers (50-60%).
